

Session 18 player handouts

Release individually. The route and object card are proposed preparation, not items already acquired. Do not share this entire file at opening.

H1 - Recovered northern transfer docket

Release: earned convoy/messenger papers or Mara's willing directions. Do not silently insert it among Session 17's already-read clues.

Continue north beyond the camp. At the final chalk fork, three pale stones mark the foot track to the split rock shelf. Loads stop at the fork. Wrapped pieces go up by hand. Keep the plate intact. Keep the recovered piece supported. Wait at the shelf for the receiver. Do not test the channels on the road.

DM: this identifies a rendezvous, not L., Frulam or the dragon. A questioned worker can convey the route in their own words. The wording is ordinary logistics, not a cipher.

H2 - The recovered mill object

Release: actual inspection/recovery of the proposed pressure witness.

Forearm-length smoky crystal in three aged bronze ribs. Roughly ten pounds. One still amber line within. Three visible retaining clips attach its casing to a stone cradle. Repeated markings resemble the geometric family of the mill channels and Observatory. Support before lifting; wrap for carrying.

Observed only if tested: near the charcoal control plate, a second amber line appears briefly beside the first. No combat benefit, full function or dragon ownership is established by this observation.

H3 - Your departure record

Release: departure chosen.

Plate carrier: _____ Recovered object carrier: _____

Packing and transport: _____ Food/water: _____

Route source: _____ Scout and marching order: _____

Care/prisoner/repair promises left in Greenest: _____

Rest actually taken and resources remaining: _____

Questions you want to ask the dragon: _____
